//summary

Overview

Front-end web developer with 5+ years of experience building, maintaining, and optimizing production websites for nonprofits, associations, healthcare organizations, financial services firms, and marketing agencies. Combines deep WordPress expertise (Elementor, Divi, Gutenberg, ACF, custom PHP) with hands-on React development. Owned projects end-to-end — from custom design and build through CRM integration, performance optimization, accessibility, and client relationships — with minimal oversight. Known for translating business requirements into clean, functional digital experiences and keeping multiple concurrent projects on track.

20+

live production sites managed solo

Where I've Worked

Web Developer

OCT 2022 – MAY 2026

Serenity Digital · Remote

- Served as sole developer supporting and maintaining 20+ live production WordPress websites across nonprofits, associations, healthcare, financial services, and membership organizations.
- Built and launched new websites using WordPress, Elementor, Divi, Gutenberg custom blocks, and ACF, often from concept to go-live without predefined wireframes.
- Extended site functionality beyond page-builder limitations using PHP, JavaScript, and CSS to meet specific client requirements.
- Integrated and maintained CRM and marketing automation systems including HubSpot, Salesforce, and Zapier across multiple client environments.
- Diagnosed and resolved production issues including plugin conflicts, layout bugs, responsive design problems, and performance bottlenecks.
- Optimized websites for SEO, accessibility (WCAG), Core Web Vitals, and cross-browser compatibility.
- Managed website migrations, hosting environments, DNS configurations, backups, and staging workflows.
- Collaborated directly with non-technical stakeholders to translate business goals into functional web solutions.

Junior Developer

SEP 2021 – NOV 2021

Duality Systems · Colorado Springs, CO

- Built forms and data-display features in React for a healthcare scheduling application at an early-stage startup preparing its product for market.
- Worked daily with React components, state management, and API-driven data to develop and test scheduling UI features.

Selected Work

Konfluence.org

LIVE

Led a full redesign with a 100% custom-built WordPress/Elementor layout — no template. Built in-page PDF readers so visitors can view scientific papers directly on the site, improving accessibility to research content.

WordPress Elementor Custom Layout PDF Embed

CVNL Membership Portal

Member-facing app with event registration, membership management, and Zapier automation for a nonprofit client.

WordPress Zapier Events

Prosper Spark

Led the redesign and full rebuild of a WordPress site, delivering an updated look and improved user experience.

WordPress Redesign

Pinetree Financial Partners

Full website build for a financial services firm with custom theme development and lead-generation features.

Custom Theme Lead Gen

Redstone Communications Group

Corporate site with custom WordPress development and content management workflows.

WordPress CMS Workflow

Impact By Insight

Nonprofit-focused web platform with CRM and marketing automation integration.

CRM Automation

Water Pros

Service business site with lead-generation forms and CRM connection via Zapier.

Zapier Lead Forms

MWCATS Baseball

Membership and registration site with custom features for a sports organization.

Membership Registration

React Portfolio

LIVE

Independently designed and built as a React application, from component architecture through deployment on Vercel — showcasing component-based development and responsive design.

React Vercel Component Design
